Decition on color and Font

- Color: White, Orange, Black, green
- Contrast between orange, while, black and green
- `Georgia, "Times New Roman", Times, serif;`
- `Lucida Sans", "Lucida Sans Regular", "Lucida Grande`

Decision on Graphics

- Graphic theme: programing, motivation

Feature on Navigation bar

- At top of each page user know which page they are on as the navbar will change color
- When its on mobile navbar will disappear and give little icon on top right corner
- When user hover navbar its change color

Feature on Banners

- The theme and feature on website draw attention from user
- User know what page they are on and answer what they are looking for

Feature on Acessibility

- Engage visually impaired
- All image has alt tag
- All image display on grid fully responsive for mobile
-

Favorite parts

- Grid display is really powerful to display a responsive webpage
- Building my own website for first time

Any Question?

Thank you!!
